

TINASHE ANDRE MAKWIRAMITI

IT Support & Network Technician

tinashedre.dev@gmail.com | +27 73 611 8217 | Johannesburg, South Africa

PROFESSIONAL SUMMARY

CCNA-certified IT and network support professional with 1 year of hands-on experience in routing, switching, WAPs, CCTV, Active Directory, and technical support. Skilled in troubleshooting, client support, and ticketing systems. Currently working towards CCNP.

CERTIFICATIONS

Cisco Certified Network Associate (CCNA)

April 2026

Microsoft AZ-900

In progress, expected end of June 2026

KEY SKILLS

• Cisco IOS LAN/WAN VLANs OSPF	• Helpdesk Support Ticketing (vTiger)
• Active Directory Windows Server 2022	• TCP/IP DNS DHCP VPN
• Splunk SIEM Sysmon Log Analysis	• Hardware Troubleshooting CCTV
• MITRE ATT&CK Threat Detection	• Linux Administration Virtualisation

WORK EXPERIENCE

Networking & IT Support Intern | WeLiveIT

Feb 2025 – Present

- Performed on-site network installations including Ethernet cabling, Wi-Fi Access Point configuration and CCTV camera systems across client sites
- Troubleshoot hardware and software issues including network printers, workstations, connectivity and websites
- Served as first point of contact for client technical issues, logging and tracking all incidents through vTiger ticketing system
- Maintained professional communication with clients throughout the full resolution process

PROJECTS

Active Directory & Cybersecurity Home Lab

Mar 2026 – Present

- Deployed a four-VM virtualised environment using VirtualBox: Windows Server 2022 Domain Controller, Windows 10 endpoint, Kali Linux attack machine and Ubuntu Server 22.04 running Splunk SIEM
- Configured a NAT network (192.168.10.0/24) with static IP addressing; implemented Splunk Universal Forwarders and Sysmon on Windows endpoints for log forwarding and telemetry collection
- Simulated adversarial attacks using Atomic Red Team mapped to MITRE ATT&CK framework and validated detection coverage through Splunk dashboards and alert rules

Technologies: VirtualBox | Windows Server 2022 | Active Directory | Splunk | Kali Linux | Sysmon | Atomic Red Team | Ubuntu Server

Cisco Packet Tracer Network Labs

Aug 2025 – Present

- Designed and troubleshoot enterprise LAN/WAN simulations covering VLANs, OSPF, HSRP and EtherChannel across multiple topologies
- Diagnosed and resolved four real-world fault scenarios including EtherChannel DTP mismatch, HSRP dual-active state and OSPF adjacency issues

Jira Service Management Lab

May 2026 – Present

- Practised ticketing and IT support workflows in Jira Service Management, managing incidents and service requests following ITSM and helpdesk processes

EDUCATION

Higher Certificate in Mobile Applications & Web Development (NQF 5)

2023 – 2024

Varsity College Sandton (now Emeris)
